

Food & Beverage / Drug Expertise

The Background:

TransTech Consulting has extensive experience working with company's operating under the strict guidelines of the Food & Drug Administration. Since 1983, TransTech has consistently provided analysis, design, project management and implementation services for such clients as Martin-Brower, Wyandot Snacks, Henry Schein, Dentsply, Medco, Sensient (Universal Flavors), Dietz & Watson, and Hatfield Quality Meats, to name a few. With the variety of services required to support these unique companies, we understand the complexities of the Food & Beverage and Drug industries.

- Lot Control
- Item and Case Serialization
- Recall Controls
- Shelf Life / Expiration Date / Strict FIFO
- Refrigeration & Freezer Requirements
- Store & "Milk Run" Delivery Requirements

We specialize in distribution/logistics design and implementation with the objective of solving our client's business problems in the most economical way possible. We do this by forming a project team with our client's management to examine supply chain processes and cost structures, define corporate strategic and operational objectives, and design and implement an optimum system.

The Results:

TransTech Consulting understands that no two companies' structures and organizational goals are identical, so we provide customized solutions and services that fit our client's requirements. For our clients in these industries our services have included Feasibility Studies, Network Analysis, Operations Assessments, Facility Designs & Implementations; Warehouse Management Systems requirements definition, specification, selection and implementation; and Master Project Management. Each solution has supported the unique requirements defined by the FDA and allowed our clients to recognize operational benefits and cost savings while maintaining compliance to federal regulations.
